Nutrient Tips and Tricks

1. Always feed your plants with nutrients.
2. Never mix A & B directly together.
3. Always use a EC and pH pen when mixing nutrients.
4. When adding A & B set EC.
5. Measure run off to make sure you don't overfeed your plants.
6. Use a circulation pump in the water, otherwise the water will become stagnant.
7. Never let your substrate completely dry out.
8. Leaf Green foliar spray should only be used when the lights are off.
9. Only use Amino Strength when used directly.
10. Adjust pH after adding all nutrients.
11. Use Keep It Clean when using an irrigation system.
